

AirMat CROSSING SYSTEMS

Series 3

Adjustable Span

- **SAFETY**
Offers zero weight transfer or disturbance to waterways and below grade equipment.
- **DURABILITY**
Has been designed and tested to withstand up to 54,000 kg (120,000 lb).
- **REUSABLE**
Series 3 can be easily relocated and used multiple times.
- **EASILY TRANSPORTED**
Series 3 can be maneuvered around site and installed using a single lift.

DESIGNED BY PROFESSIONALS, FOR PROFESSIONALS

The AirMat Series 3 was designed to meet the need for a safe, cost effective method for crossing waterways and gaps larger than 1.2m (48"). The patent pending design was engineered to exceed all crossing requirements.

Series 3 is an easy to use solution that can be installed within an hour using a single lift with a minimal environmental impact.

All AirMat products are made in Alberta with the user in mind. For the comparable material price as traditional crossing methods, AirMat products can be used in permanent installations but are made with the durability that enables them to be relocated and used multiple times.

Custom widths are also available.

Standard Product Details

Model Number: AM-S3-48-STD
Min. Size (L x W x H): 3,875 mm (144") x 7,700 mm (303") x 355 mm (14 1/16")
Max. Size (L x W x H): 4,875 mm (192") x 7,700 mm (303") x 355 mm (14 1/16")
Spans (Min./Mid./Max): 1,220 mm (48") / 1,830 mm (72") / 2,440 mm (96")
Max Axle Weight: 16,000 kg (35,300 lb)
Max. GVW: 45,000 kg (99,200 lb)
Construction: Painted Steel

Model Number: AM-S3-812-STD
Min. Size (L x W x H): 4,875 mm (192") x 7,700 mm (303") x 355 mm (14 1/16")
Max. Size (L x W x H): 6,096 mm (240") x 7,700 mm (303") x 355 mm (14 1/16")
Spans (Min./Mid./Max): 2,440 mm (96") / 3,050 mm (120") / 3,660 mm (144")
Max Axle Weight: 16,000 kg (35,300 lb)
Max. GVW: 32,000 kg (70,560 lb)
Construction: Painted Steel

Model Number: AM-S3-812-HD
Min. Size (L x W x H): 6,096 mm (240") x 7,696 mm (303") x 418 mm (16 7/16")
Max. Size (L x W x H): 7,315 mm (288") x 7,696 mm (303") x 418 mm (16 7/16")
Spans (Min./Mid./Max): 2,440 mm (96") / 3,050 mm (120") / 3,660 mm (144")
Max Axle Weight: 24,000 kg (52,910 lb)
Max GVW: 54,000 kg (120,000 lb)
Construction: Painted Steel

AM-S3-1216-STD & AM-S3-1216-HD are also available, please contact sales for details.

Custom widths are available, please contact sales for details.
